

Develop the accountancy talent of the future.

The Growth Company currently has a group of highly motivated accounts learners working towards an AAT Level 2 Foundation Diploma in Accounting and Business with us. In order to achieve their qualification - which will then enable them to progress onto a Level 3 Accountancy apprenticeship - they are required to complete five days work experience in an accounting/finance department.

Can you or someone you know help us make a positive difference to these young people? Five days is a short time but will make a huge difference to a young person. We can achieve more by working together.

The work experience can consist of either:

Actual work experience - the learner would spend a short period of time learning the different aspects of the business and how a finance department works with regards to processes and systems, including an explanation as to

why these processes are carried out.

or:

Work shadowing - the learner would be assigned to a member of staff or an apprentice, and would follow their daily routine to learn about their work, the processes they carry out and the systems they use

A combination of both the above would also be fine.

Our learners are highly motivated and have demonstrated their punctuality and reliability during their time with us to date.

If you can offer support with providing a suitable work experience opportunity or are interested in recruiting an apprentice, please contact:
